Total Recon
Cash Reconciliation

Revolutionizing Cash Reconciliation for Hospitality

Welcome the future of **cash** reconciliation with Total Recon, a cloud-based solution that automatically reconciles your cash against your point of sale - completely reimaging cash management.

Evention™

Total Recon

Cash Reconciliation Automated

Tedious and error-prone processes have stalled the traditional hotel cash management for decades. Total Recon automatically reconciles your cash transactions while enabling full compliance and cash accountability with detailed analytics. Make cash reconciliation easy and repeatable for everyone on your finance team.

What Total Recon can do for you:

✔ Eliminate Spreadsheet Reconciliation
Total Recon offers an intuitive web-based application that highlights discrepancies and allows easy clearance with just a few clicks. Access your data anywhere with our online dashboard.

✔ Manage Cash Over/Shorts
Total Recon swiftly reconciles cash drops against the POS, enabling your finance team to reconcile an entire day's transactions in just minutes.

✔ Increase Cash Accountability and Control
Customized reporting providing full visibility into all your cash transactions, including over/short reports with highlighted violations over any date range.

✔ Uniform Process
Achieve confident month-end and balance sheet reconciliation and facilitate onboarding for new associates - standardized practices and efficient cash management.

> An integrated system aiming at improving the efficiency of cashiering function and internal controls environment. Furthermore, aids in the **elimination** of the redundant manual cash counting process and increases the general cashier's and other operation staff's productivity.
