Over 90% of corporate spreadsheets contain errors, **COSTING COMPANIES BILLIONS.***

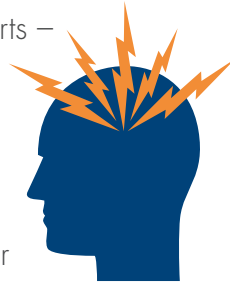

Can you afford a mistake?

In the hospitality industry, manual spreadsheet errors are the norm, not the exception. One California hotel was overpaying \$70,000 annually in service charges; another property overpaid employees \$17,000 in just 4 months! And the list goes on. That's why organizations processing tips and gratuities manually through a spreadsheet are a ticking time bomb for non-compliance, payroll disputes, and nasty audits. The time is past for inefficient, 'old-school' methods.

Evention ends gratuity distribution headaches

Imagine if you could reduce audit time by 25%, eliminate manual data entry, and instantly create payroll reports – all with pinpoint accuracy. With Evention, you can.

Evention's web-based Tips & Gratuities Management solution integrates seamlessly with your Time & Attendance POS, Event Management, Payroll, and other data source systems. The result? Faster, simpler, and more precise gratuity distribution, delivered directly through the existing payroll.

Say goodbye to:

Error-prone annual spreadsheets
